### Restriction Requirement

#### Status of the Claims

1. Acknowledgment is hereby made of the response submitted 15 April, 1999, wherein claims 1 and 2 were amended and new claims 46-56 were submitted. Claims 1-13 and 46-56 are pending. Applicants are reminded that pursuant to 37 C.F.R. § 1.142 a restriction requirement "may be made at any time before final action in the case, at the discretion of the examiner."

#### Fax Response Pilot for

#### Written Restriction Requirements

2. In an effort to enhance communication with our customers and reduce processing time, Group 1640 is running a Fax Response Pilot for Written Restriction Requirements. A dedicated Fax machine is in place to receive your responses. The Fax number is (703) 305-3794. A Fax cover sheet is attached to this Office Action for your convenience. We encourage your participation in this Pilot program. If you have any questions or suggestions please contact Paula Hutzell, Ph.D., Supervisory Patent Examiner at Paula.Hutzell@uspto.gov or 703-308-4310. Thank you in advance for allowing us to enhance our customer service. **Please limit the use of this dedicated Fax number to responses to Written Restrictions.**

#### Restriction/Election

a. Restriction to one of the following inventions is required under 37 C.F.R. § 1.21:

a. Group I, claims 1-3, 11-13, and 46 drawn to an assay for identifying inhibitors of influenza virus nucleoprotein-host cell protein binding interactions, classified in class 437, subclass 5.

b. Group II, claims 4, 9-13, and 47 drawn to an assay for identifying inhibitors of influenza virus NS1-host cell protein binding interactions, classified in class 437, subclass 1.

1. Group III, claim(s) 46 and 47, drawn to an assay for identifying inhibitors of **viral protein-host cell viral transport protein** binding interactions, classified in class 435, subclass 5.

5 i. Group IV, claim(s) 48 and 49, drawn to an assay for identifying inhibitors of **parainfluenza virus** protein-host cell protein binding interactions, classified in class 435, subclass 5.

10 e. Group V, claim(s) 49 and 50, drawn to an assay for identifying inhibitors of **measles virus** protein-host cell protein binding interactions, classified in class 435, subclass 5.

15 f. Group VI, claim(s) 49 and 50, drawn to an assay for identifying inhibitors of **respiratory syncytial virus** protein host cell protein binding interactions, classified in class 435, subclass 5.

20 g. Group VII, claim(s) 51, drawn to an assay for identifying inhibitors of **human immunodeficiency virus** protein-host cell protein binding interactions, classified in class 435, subclass 5.

25 h. Group VIII, claim(s) 52, drawn to an assay for identifying inhibitors of **herpes viridae** [sic: Herpesviridae] virus nucleoprotein-host cell protein binding interactions, classified in class 435, subclass 5.

30 i. Group IX, claim(s) 53, drawn to an assay for identifying inhibitors of **adenoviridae** [sic: Adenoviridae] protein-host cell protein binding interactions, classified in class 435, subclass 5.

35 j. Group X, claim(s) 54, drawn to an assay for identifying inhibitors of **bunyaviridae** [sic: Bunyaviridae] protein-host cell protein binding interactions, classified in class 435, subclass 5.

40 k. Group XI, claim(s) 55, drawn to an assay for identifying inhibitors of **arenaviridae** [sic: Arenaviridae] protein-host cell protein binding interactions, classified in class 435, subclass 5.

45 l. Group XII, claim(s) 56, drawn to an assay for identifying inhibitors of **orthomyxovirus-like** protein-host cell protein binding interactions, classified in class 435, subclass 5.

4. The inventions are distinct, each from the other because of the following reasons:

5. Inventions I-XII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together, or they have different modes of operation, or they have

different methods, as they have different effects upon the host cell. For example, the host cell may be a cell of the same type as the cell which employs different viral proteins (e.g., HBV, HCV, etc.) or a different viral protein (e.g., HCV, etc.), with myxoviridae; Arenaviridae; Rhabdoviridae; Bunyaviridae; Adenoviridae; Herpesviridae; Paramyxoviridae; Lentiviridae, and genera (e.g., Paramyxovirus; Morbillivirus; Pneumovirus). These viruses are all genotypically and phenotypically distinct. Accordingly, each method will employ different viral and cellular proteins thereby necessitating separate and independent searches. Therefore, each invention is clearly drawn toward a different inventive concept.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, requirement for independent searches, and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

#### **Claim Cancellation**

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a timely-filed petition under 37 C.F.R. § 1.48(c) and by the fee required under 37 C.F.R. § 1.104.
